Dear Juan

Re: Draft RALI MS 38— Coordination of FSS Earth station transmitters and terrestrial microwave fixed services in the 27.5–30 GHz band Consultation paper

Communications Alliance welcomes the opportunity to provide our response to the ACMA *Coordination of FSS Earth station transmitters and terrestrial microwave fixed services in the 27.5–30 GHz band Consultation paper*.

Communications Alliance acknowledges the ACMA's consideration of our earlier submissions that we provided on the TLG papers and would like to confirm that we are comfortable with the policy direction that the ACMA has taken in drafting this RALI. Communications Alliance has no further proposals to make regarding the substance of the draft RALI.

The next step will be for the ACMA to finalise the RALI once all the comments have been submitted. During this process, if the ACMA sees a need to seek further external assistance, for example in resolving any potential differences raised by practising assigners, Communications Alliance could through its mediation experience provide some assistance in facilitating a resolution with the parties, if required.

If you have any further questions with regard to the points raised in this submission please contact Mike Johns on (02) 9959 9125.

Yours sincerely

John Stanton
Chief Executive Officer
